

Validated Reference Material of *rolling proof 2019*

Multi-method pesticides in red lentils P1903-RMLe

- Summary -

Please note: Reference material P1903-RMLe is a validated control material and not a certified reference material. The reference material consists of 100 g of a red lentil flour homogenate, which is spiked with 35 pesticides. The corresponding untreated red lentil flour (100 g) is available as blank material P1903-BLLe.

The reference material is validated in a ring test with 7 laboratories. The spiked levels and the assigned values, calculated of the results of the participants of *rolling proof* – module cereals and pulses 2019 (P1903-RT), are summarised in table 1.
