

Validated Reference Material of *rolling proof 2021*

Multi-method pesticides in raspberries

P2119-RMRa

- Summary -

Please note: Reference material P2119-RMRa is a validated control material and not a certified reference material. The reference material consists of 120 g of raspberries and was spiked with 27 pesticides. The specification of the reference material P2119-RMRa includes 26 pesticides. The spiked pesticide spirodiclofen is not part of the specification due a degradation of spirodiclofen in the test material. The reference material is validated in a ring test with 10 laboratories.

The spiked levels and the assigned values, calculated of the results of the participants of *rolling proof* – module vegetables and fruits 2021 (P2119-RT), are summarised in table 1.
