

Validated Reference Material of *rolling proof 2019*

Multi-method pesticides in green tea P1904-RMTea

- Summary -

Please note: Reference material P1904-RMTea is a validated control material and not a certified reference material. The reference material consists of 100 g of milled green tea, which is spiked with 35 pesticides. The corresponding untreated milled green tea (100 g) is available as blank material P1904-BLTea.

The reference material is validated in a ring test with 10 laboratories. The spiked levels and the assigned values, calculated of the results of the participants of *rolling proof* – module tea and spices 2019 (P1904-RT), are summarised in table 1.
